Abinash Selvarasu

Software Engineer · Java, Spring Boot, Go · Chennai, India
abinash@theabx.in | theabx.in | linkedin.com/in/abinash-selvarasu | github.com/AbiXnash

Summary

Software engineer building payment and regulatory integrations for banking clients with Java, Spring Boot, Kafka, and Oracle. First author of peer-reviewed Springer papers on deep-learning intrusion detection for industrial and cyber-physical systems. Outside work I build Go services and developer tools, including a local, privacy-first AI code reviewer.

Experience

Mindgate Solutions Jul 2025 – Present
Software Engineer *Chennai, India*

- Built tax-payment portal services for a multinational banking client, integrating with **multiple Nigerian payment channels** for regulatory tax collection.
- Developed an internal **cryptographic digital-signature generator** used to sign requests for a Middle East regulatory API integration.
- Built Java/Spring Boot **microservices** on WebSphere, using **Kafka** and **WebSphere MQ** for messaging and **Oracle DB**/PostgreSQL for persistence.
- Wrote **Spring Batch** data-migration tools and other internal utilities used day to day by the engineering team.

Projects

Codist | *Go, Svelte, TypeScript, tree-sitter, Ollama* 2026

- Local AI code reviewer for Java/Spring Boot repos that watches git, reviews every commit, and proposes fixes for approval; ships as a **single Go binary** and nothing leaves the machine.
- Parses Java with **tree-sitter** into a live dependency graph streamed to a Svelte UI over **server-sent events**; runs deterministic rules (unguarded `Optional.get()`, SQL concatenation, `@Transactional` self-invocation) before the LLM pass.
- Cut re-review time to seconds by caching model answers, skipping trivial diffs, and routing review, summary, and fix jobs to separately sized local models.

Publications

- **S. Abinash**, N. Srivatsan, S. K. Hemachandran, S. Priyanga. *HGCNN-LSTM: A Data-driven Approach for Cyberattack Detection in Cyber-Physical Systems.* SN Computer Science (Springer), vol. 6, 2025.
- **S. Abinash**, V. S. Shankar Sriram, K. Krithivasan, S. Priyanga. *HATT-MLPNN: A Hybrid Approach for Cyber-Attack Detection in Industrial Control Systems Using MLPNN and Attention Mechanisms.* ATIS 2024, CCIS (Springer), 2024.
- *HyGAN-AD: A Hypergraph-based GAN Framework for Cyberattack Detection in Critical Infrastructures*
- *HyperCoar-DAM: A Robust Intrusion Detection System for Enhancing IIoT Networks Protection*

Technical Skills

Languages: Java, Go, Python, TypeScript, Kotlin, SQL, Lua
Backend: Spring Boot, Spring MVC, Spring Batch, Lombok, Gin, Echo, REST APIs, Microservices
Data & Messaging: Oracle DB, PostgreSQL, libSQL, Apache Kafka, IBM WebSphere MQ
Frontend & Tools: React, Next.js, Svelte, Qwik, Tailwind CSS, Git, Docker, Linux, Cloudflare Workers

Education

SASTRA Deemed University Thanjavur, India
B.Tech, Computer Science and Engineering *2021 – 2025*
